<i>Notes/Comments</i>
<p>1. Residual Solvent testing is for informational purposes only. A limit is referenced for informational purposes, not for quality control and regulatory release of product under test.</p> <p>2. PPM = parts per million</p> <p>3. LOQ = Limit of Quantitation. Compounds may be detected below the LOQ. Compounds detected below LOQ are below the calibration range of the method and are not quantified.</p> <p>4. ICH Q3C = International Conference on Harmonisation, Impurities: Guideline for Residual Solvents</p>
