Analysis Date:	7/5/15		7/2/15	7/2/15	7/5/15	

NA = Not Applicable ND = Not Detected
 Detection Limit is based on the dry weight equivalent.
 -BLK = The method blank associated with this batch.
 -dup = The method duplicate associated with this batch.
 *Compound concentration is estimated based on linalool.
 **Compound concentration is estimated based on caryophyllene.
 ? Compound has not been verified by standard.

NA = Not Applicable ND = Not Detected

Detection Limit is based on the dry weight equivalent.

-BLK = The method blank associated with this batch.

-dup = The method duplicate associated with this batch.

*Compound concentration is estimated based on CBC or CBD.

? Compound has not been verified.

NOTE: THCV Tetrahydrocannabivarin is THC-C3

Batch QC - From a previous batch.

Notes:

- NA = Not Applicable ND = Not Detected
- Detection Limit is based on as received basis.
- Detection Limit is higher for some pesticides, due to the matrix.
- BLK = The method blank associated with this batch.
- BS = The blank spike associated with this batch.
- MS = The matrix spike associated with this batch.
